

FREE STARTER GUIDE

THE AESTHETIC BLUEPRINT

5 Moves. Real Food. Zero Excuses.

The foundation every beginner needs to start building an aesthetic physique — with or without a gym.

E-Rank to D-Rank. Your arc starts here.

by John FQ · @fqmedia4 · johnfq.com

WHO THIS IS FOR

You have been watching fitness content for months. You want the physique. You do not have a perfect gym, a big budget, or anyone showing you how to start with what you actually have. This guide is built for you — not for someone with ideal conditions.

You do not need perfect conditions. You need the right 5 moves and the right food. That is it.

YOUR CURRENT RANK

Before you start any programme you need to know where you are. This guide uses an anime ranking system — borrowed from JJK and Solo Leveling — to track your progression.

E-RANK	Cannot do 5 clean push-ups. No training history. Starting from absolute zero.
D-RANK	Can do 5–10 push-ups. Some movement history. Ready for this guide.
C-RANK	15+ push-ups, 5 pull-ups. Ready for the full 12-week programme.
B to S-RANK	Advanced athlete. The full programme will still challenge you.

THE 5 FOUNDATION MOVES

Master these before anything else. Every aesthetic physique is built on this base.

1. PUSH-UP

CHEST + SHOULDERS + TRICEPS

Sets: 3–4
sets

Reps: 8–15
reps

Rest: 90 sec

Tip: Chest touches the floor on every rep. No half reps — they build nothing. Progress to diamond push-ups when 15 feels easy.

Baki chest. Star Platinum upper body. This is your primary push movement for life.

2. PULL-UP / INVERTED ROW

BACK + BICEPS

Sets: 3 sets

Reps: 6–10
reps

Rest: 90 sec

Tip: Full dead hang at the bottom. Pull until chin is over the bar. Cannot do pull-ups yet — do inverted rows under a table.

Zoro back. The wide V-taper that makes every shirt fit differently. Non-negotiable.

3. BODYWEIGHT SQUAT

LEGS + GLUTES

Sets: 3–4
sets

Reps: 12–15
reps

Rest: 60 sec

Tip: Break parallel — thighs below horizontal. Chest tall. Drive through your heels. Progress to jump squats.

Goku legs. Functional power. Most calisthenics athletes skip legs. You will not.

4. PARALLEL BAR DIPS

CHEST + TRICEPS

Sets: 3 sets

Reps: 8–12
reps

Rest: 90 sec

Tip: Use two chairs at home if no bars. Lean slightly forward for chest emphasis. Full range every rep.

Adds chest depth and tricep size faster than almost anything else. Essential.

5. PLANK + HOLLOW BODY HOLD

CORE

Sets: 3 sets

Reps: 30–45
sec hold

Rest: 45 sec

Tip: Plank: straight line head to heels, squeeze glutes. Hollow body: lower back pressed to floor, arms overhead.

These two movements replace 100 crunches. The flat aesthetic stomach comes from here.

YOUR WEEK 1 SCHEDULE

Train 4 days. Rest 3 days. This is not negotiable.

MONDAY	Full circuit: Push-up 3x10, Inverted Row 3x8, Squat 3x12, Dips 3x8, Plank 3x30sec
TUESDAY	REST — Walk for 20 minutes minimum. Eat well. Sleep before midnight.
WEDNESDAY	REST — Active recovery. Light stretching. Prep your food for tomorrow.
THURSDAY	Full circuit: same as Monday. Add 1 rep to each exercise if Monday felt manageable.
FRIDAY	REST
SATURDAY	Full circuit: same as Thursday. Focus on form not speed.
SUNDAY	REVIEW — Film your Week 1 check-in. Same spot. Same pose. This is your data.

REAL FOOD. REAL MUSCLE.

You do not need supplements. You need protein, carbs, and consistency.

BREAKFAST	3 eggs + ugali + black tea	Protein to start the day. Eat within 30 min of waking. Eggs are the most complete muscle-building food available.
MID-MORNING	Milk + banana	Simple carbs and protein. Have this 30 min before training if you train in the morning.
LUNCH	Beans + rice + sukuma wiki	Your biggest meal. Beans are elite plant protein. Add cooking oil for healthy fats.
POST-WORKOUT	Milk + 2 boiled eggs	Most important meal. Eat within 45 min of finishing. Your muscles absorb protein fastest right now.
DINNER	Chicken liver or fish + ugali or chapati	Chicken liver is the most nutrient-dense food available. Iron, zinc, B12, protein. Cheaper than chicken breast and more effective.

Rule: Eat protein at every meal. Drink water before every session. Sleep 7 hours minimum. That is 80% of your nutrition sorted.

READY TO GO DEEPER?

THE AESTHETIC BLUEPRINT

12-Week Hybrid Programme

- ✓ Weeks 1–4: Full calisthenics — no gym needed
- ✓ Weeks 5–12: Gym training with progressive overload
- ✓ Full nutrition guide using real local food
- ✓ Anti-quit accountability system
- ✓ WhatsApp community access
- ✓ Local supplement replacement guide
- ✓ 30-day money back guarantee
